

As a teenager this is how I listened to music:

DAAD

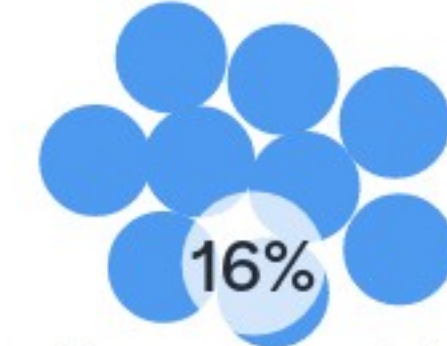

Which priorities would you set? (3 options)

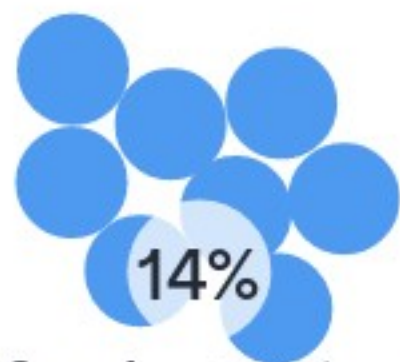

learner-focused approach

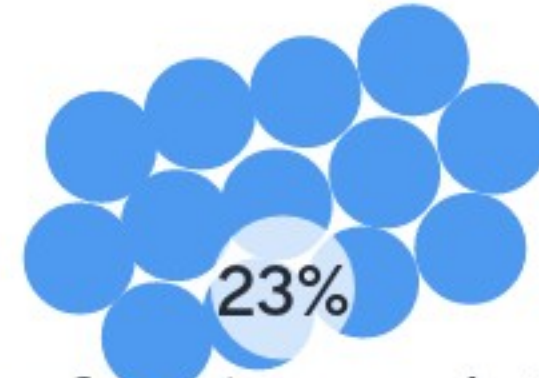

multi-lingual approach

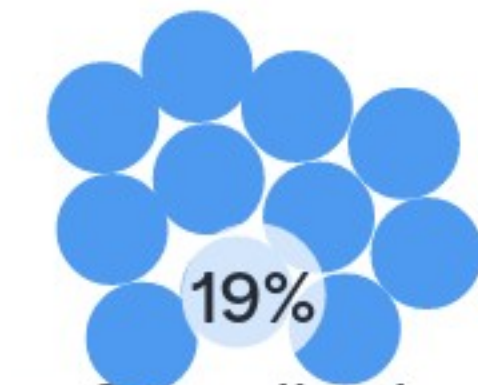

continuous pedagogical training for staff

Digitalisation of administrative processes

Interoperability of systems, platforms and hubs

user-friendly design

Make a wish for the future of digital education! How can we further strengthen cooperation between European HEIs?

DAAD

Staff exchange

Support exchange and mutual cooperation through coordination

Valorize teachers investment in digital education

Be resilient

Standardization

common tools

Academic cooperation

I believe one of the main next steps is to make it more tangible for the stakeholders,

As student, I can apply to any short programme in the EU and recognized in ECTS in my country of origin.

Make a wish for the future of digital education! How can we further strengthen cooperation between European HEIs?

DAAD

Physical mobility should include preparatory virtual mobility

Live my life through staff/student/teacher exchange

Further cooperation and peer learning.

Integration of different initiatives and tools on national and international level.

Allowing joint degrees in european HEI

Promote amazing research and pedagogical projects able to connect students teachers and staff

Stop reinventing the wheel but valorise what already works

Leadership development

Make a wish for the future of digital education! How can we further strengthen cooperation between European HEIs?

DAAD

To implement the created solutions of the project OpenU in practices around Europe.
To continue mutual cooperation.

Administrative Interoperability

Joint degrees, mutual diploma recognition and interoperability of platforms

Hire specialists who understand the public universities of Europe in order to provide a visible offer, with free access

I want another two wishes

Rethinking the structure and simplify, to really reach an integrated European Education Area
